

**In the Specification**

Please replace the first full paragraph on page 7 of the specification with the following:

In practice of the present invention, the center point 49 and plane and edge directions of first fixing mark 41 are measured by deflecting an optical radiation beam across said first fixing mark 41 in first and second intersecting directions and the position of linear edges 51 and 53 is determined. Based on this information a first temporary coordinate system 47 (FIG. 3) is created.
